RE: Limestone Lease # ML29434

DIVISION OF
OIL GAS & MINING

Dear Mr. Smith:

This letter is to serve as written commitment to the terms as outlined below.

1. Every autumn (September-November), the operator shall contemporaneously reclaim any and all portions of the operation which are no longer necessary to facilitate the mining activity.
2. This reclamation shall be accomplished with the Soil Conservation Service/Division of Oil, Gas & Mining approved seed mix. All areas to be reclaimed will be fertilized as per the results of soil tests. The seedbed will be disced and seed will be broadcast and dragged.
3. A transect will be conducted annually (June or July) to ascertain the degree of reclamation success.
4. Changes in the treatments (land preparation, fertilization, etc.) will be implemented as necessary to achieve the required reclamation success.

Sincerely,

Thomas E. Robison
General Manager
